

Garden Decking

- Heavy Duty Decking
- Pressure Treated
- Handrails
- Spindles
- Newels

Acorn launched their own **decking system** in the summer of 2001 and since then have supplied hundreds of decks in the Oxfordshire area. With over 25 years experience supplying timber and timber components from our Kingston Bagpuize workshops we were able to develop a no nonsense system under our own control and, as a result, have produced a very competitively priced product.

As a result of volume production and greater purchasing power we are able to offer a high quality dual purpose decking board at a very competitive price.

Components are kept in stock so there should be no delay in starting your project, so why not come and see our display area and discuss a few ideas.

Garden Decking Components
